

Connor and His Kingdom

Once there was a boy whose name was Connor. He was a king. He lived in a pesfull kingdom till one-day knights attacked the kingdom. Connor sent people to attacked the knights. The people won the battle. He lost 24 people.

The next day the knights were back and the knights destroyed the kingdom. Connor was able to get 11 people out of there. Connor took the people somewhere else. They made a house to live in for now.

One week later they went back to Connor's kingdom to look for people. They found 2 people and the kingdom was gone. He made his people make a new kingdom to live in. They made a better kingdom with more people in it. He got better warriors to fight the knights.

He got more money by killing knights. With the money Connor upgraded his warriors and kingdom.

Five weeks later Connor had 4,000 warriors, and he sent 200 warriors out to make a spy kingdom. He sent all 3,800 warriors to kill the knights. He and his warriors got to the knights castle. No one was there. Then fire arrows came down on the warriors. Then Connor attacked the castle. The fight ended at night and Connor was hurt and his warriors could not find him. Some of Connor's warriors were alive. Ten warriors were alive and they made a new king and his name was Cody. He made 900,000 warriors in one week. Cody was a better king then Connor.

Three weeks latter Connor was alive. He had made a house. Then Connor came back to the kingdom. Now Connor was the king again and Cody was a warrior again. Then knights came and they had fire catapults. Connor sent all of his warriors out to kill the knights. Connor lost all of his warriors and he killed all of the knights to. So Connor made more warriors and more knights came. He sent more warriors. There was 999,000 knights. He thought he was dead. But Connor kepted fighting. Soon Connor killed all of the knights and he wanted a new kingdom where the knights will not find him. So Connor did that.

Three years later the knights found him but Connor had a surprise for them. When the knights got closer Connor had a laser gun and he killed the knights. He had 99,000 warriors and he sent all of them out to kill the knights. Connor won but he found out that the knights had a big dragon. Connor ran! When he got to his kingdom he sent all of his warriors to attack the dragon. The dragon killed all of the warriors. Connor sent more warriors to fight the dragon. The dragon killed all of those warriors. The dragon ate Connor's arm. Connor ran to his kingdom and went underground. The dragon destroyed Connor's kingdom. When Connor got out of the ground he ran to his spy castle. Connor got 9,999,000 warriors to kill the dragon.

The next week Connor got more warriors. He sent them out and this time they fought the dragon too. The dragon killed all of his warriors. Connor was the only one alive. It was a real battle.

Two weeks later, Connor killed the knights to get to an airport. When Connor got to the airport, he moved to the States to get more warriors. When Connor got his warriors he moved back to England. Then he found green monsters. They were 1,000 times taller than the warriors. He killed them. He made a home to live in at night. At day they went back to his kingdom.

When they got there, dragons were eating the kingdom. The warriors killed the dragons and made a better kingdom and they used some of the dragon spikes for doors. When they were done building the house it was very tall and long. It had 19 bathrooms 285 bedrooms and 156 dinning rooms. Connor had 999,000 warriors.

Connor and his warriors went out looking for some warriors that were lost. He found 67 warriors and he had so many warriors when one guy came to attack they could kill them in one secant. They lived happy and no one hurt them again. The end.
